

English for nurses - Grundlagenseminar

Do you know the difference between a wrist and a Rist?
If not, this seminar is for you.

A language needs to be spoken regularly otherwise your skills become rusty. By improving your language skills you also improve your nursing care, as patient and nurse understand each other better.

On two separate mornings you will refresh your vocabulary of words associated with the human body and some basic procedures. You will listen to nurse - patient dialogues and practise using them during role play. Perfect grammar is not essential but a basic knowledge of English is a must.

Zielgruppe Pflegende aus allen Bereichen.
Englisch-Grundkenntnisse sollten vorhanden sein!

Inhalte Using speech ■ Written exercises ■ Role playing to prepare for the use of English in the working situation

Dozent/-in Teresa Blundell
